INTRODUCTION

With expertise in designing scalable, efficient workflows, I integrates tools like Airtable, Slack, Google Sheets, Gmail, and OpenAI to deliver seamless, high-impact solutions. His systematic approach to automation, coupled with a commitment to quality and client satisfaction, shapes ideas, concepts, designs, and code into real projects that drive measurable results.

WORK EXPERIENCES

2025 KisanMarkaz

Full Stack Developer

- Built custom workflows to automate business operations, lead capture, and task management
- Integrated tools like Airtable, Slack, Google Sheets, Gmail, OpenAI, and more
- Designed robust error handling and fallback systems for reliability
- Collaborated with business teams to analyze requirements and design automation flows

2024 BIT Technologies

Full Stack Developer

- Designed scalable n8n-based backend workflows for internal systems
- Created reusable workflow templates for lead gen, CRM updates, and data syncing

- Introduced logging, monitoring, and optimization into automation pipelines

2023 Tres Mind

React Native Developer

- Developed on-demand automations for marketing, operations, and sales
- Provided training sessions and documentation for clients' internal teams
- Helped teams migrate from Zapier/Make to n8n for self-hosted control and flexibility

KEY ACHIEVEMENTS

2025 Project Success

Completed over 16+ development projects with a 96% success rate, delivering robust and scalable solutions.

2025 YouTube Shorts Automation:

Built a fully automated AI-driven YouTube Shorts generator with n8n, increasing client content output by 40%.

2025 Client Engagement Boost:

Enhanced user engagement by 45% through optimized, user-friendly automation interfaces for web and mobile platforms.

2025 Workflow Optimization:

Reduced project delivery time by 25% by streamlining n8n workflow processes and implementing efficient automation practices.
